Summary

Currently study in concordia department of computer science and software engineering department, master degree. personal telechnology stack includes python, java ,C#, C++, opengl, unity, python-flask, mysql, mongodb. opengl, knowledge of machine learning api, neural network api, java distribution knowledge(rmi), knowledge based database(datalog,prolog). basic web design knowledge(html,css,etc.).

Personal Web Project :

python flask personal website.

python sklearn "avocado price prediction" with nested ML techniques.

python NLP reuters news sentimental analysis.

Java webcrawler.

python flask "moive recommendation system" with mongoDB atlas, deploy online,with ML to recommend movie.

Personal Graphic Project:

openGL Game "Space War" using C++.

openGL project "human body simulator" using C++.

Unity 2D RPG Game "the holy sword" with C#.

Unity 3D RTS Game "Prison Break" with C#, using adaptive AI.

Database Project

DataLog, using smart databse to analysis user's query.

Experience

Assistant Web Developer

BYWIN LIMITED

May 2018 - Jul 2018 (3 months)

was junior java developer,and AI model trainer. assist senior developer to analysis the requirement and write visual document for stakeholder. Also help Ai group by using photoshop to crop manufactured parts from raw images to train model. <http://www.bywin.cn/intro.htm>

Education

Concordia University

Master's degree, Computer Science

Jan 2021 - Aug 2022

Concordia University

Bachelor's degree, Computer Science

2017 - 2020

Skills

MongoDB • MySQL • Python (Programming Language) • Machine Learning • Web Development •
Java • Web Design • Neural Networks • Unity • Flask
