Web Development

# DEJIAN WANG

Graduate Student at Gina Cody School of Engineering and  
Computer Science, Concordia University  
Montreal

## Summary

Currently study in concordia department of computer science and software engineering department, master degree. personal telechnology stack includes python, java ,C#, C++, opengl, unity, python-flask, mysql, mongodb. opengl, knowledge of machine learning api, neural network api, java distribution knowledge(rmi), knowledge based database(datalog,prolog). basic web design knowledge(html,css,etc.).

Some Previous Project in University :

python flask personal website.

openGL Game "Space War" using C++.

openGL project "human body simulator" using C++.

Unity 2D RPG Game "the holy sword" with C#.

Unity 3D RTS Game "Prison Break" with C#, using adaptive AI.

python sklearn "avocado price prediction" with nested ML techniques.

python NLP reuters news sentimental analysis.

Java webcrawler.

python flask "moive recommendation system" with mongoDB atlas, deploy online,with ML to recommend movie.

DataLog, using smart databse to analysis user's query.

---

## Experience

bywin 半云科技

Assistant Web Developer

May 2018 - July 2018 (3 months)

Fujian, China

was junior java developer,and AI model trainer. assist senior developer to analysis the requirement and write visual document for stakeholder. Also help Ai group by using photoshop to crop manufactured parts from raw images to train model. <http://www.bywin.cn/intro.htm>

---

## Education

Concordia University

Master's degree, Computer Science · (January 2021 - August 2022)

Concordia University

Bachelor's degree, Computer Science · (2017 - 2020)
